Breathe free **Breathe Euromate®**

## Away irritation and smoke nuisance!

Say goodbye to headaches, apathy and irritations to eyes and bronchi... No more smoke nuisance and arguments about smoking ... The Grace Air Cleaner filters out all kinds of air pollution including tobacco smoke and creates a pleasant living and working environment. Clean indoor air has a positive effect on work performance and productivity and reduces illness-related absence.

### Stop pollution of the indoor air!

The air in offices, computer, refreshment and meeting rooms, and reception areas is full of millions of invisible harmful particles, such as dust, micro organisms (bacteria, viruses, fungi and pollen), hairs, aerosol and, last but not least, tobacco smoke.

An air conditioner controls only the air temperature and not the air purity. Opening the windows only results in costly heat losses and the outside air is often so polluted that it is unwise to let it in. The Grace Air Cleaner, however, does remove pollution from the indoor air by filtering out all the harmful particles.

### The most graceful style in air cleaning.

A renowned team, winner of many international awards, created the attractive and yet timeless design. The Grace Air Cleaner also received various design awards. The Grace Air Cleaner is available in seven stylish colours, can be placed anywhere without installation and is very simple to operate. The sound level is particularly low, even less than that of an average desktop computer.

### Unparalleled performance.

Three filters keep the indoor environment clean. The *pre-filter* traps the coarser dust.

The *disposable filter* then catches the smaller particles down to a size of 0.01 micron (=0.00001 mm!) such as cigarette smoke. The *activated carbon filter* adsorbs unpleasant smells. The media filter is made of extra sturdy material that is designed in such a way that a very large effective surface is created. The result: a low air resistance and a high dirt trapping capacity. The filters have an anti-bacterial coating to prevent bacteria growth. The Grace Air Cleaner is pre-eminently suitable for use in dusty rooms.

### Easy to service.

The Grace Air Cleaner does not require much maintenance. All filters can be removed and replaced by new ones in no time! But your Grace Air Cleaner will always work optimally without any hassle to you when you opt for a service contract. The polluted filters will then be replaced regularly by clean ones.

### Pure innovation.

No other air cleaner can compare with the Grace Air Cleaner:

- High filter performance
- Can be placed anywhere; a floor area of only 29 x 38 cm is needed
- Magnificent design that enhances any workplace
- Makes less sound than an average desktop computer
- Simple one button operation

#### Technical information

Reach	up to 90 m <sup>3</sup>
Airflow	395 m <sup>3</sup>
PRR	230 m <sup>3</sup> /h
Fan speed	3
Filter set	Pre-filter, Disposable filter with Activated carbon filter
Control	1-button operation
Mounting	freestanding
Dimensions	380 x b 290 x h 850 mm.
Weight	13 kg.
Power supply	230 V, 50 Hz / 115 V, 60 Hz
Power consumption	60 W
Guarantee period	12 months

winter grey   desert yellow   sunset red   day blue   night blue   sea green   autumn red
